To Whom It May Concern:

My daily commute takes me from 30 south of Dallas, Texas to Southlake, Texas, right through the heart of the Dallas / Ft. Worth metroplex. I depend upon XM instant traffic reports to help me negotiate the best route every day. There is not another public radio traffic report that is updated nearly quick enough to allow me to make realtime decisions. XM traffic reports are updated and refreshed every few minutes, allowing decisions and corrections to be made in time.

I repectively request you to reject the NAB's petition 04-160. I pay for these services and it is my right to have them.

Respectively,

P. Deville
